- Outlook
- Live Demonstration

# AAI-Portal Overview

# Goals

- Connecting resources to AAI
- Multi AAI capability
- AAI independent
- Easy implementable resource adaptors
- Easy connectible resources

# Challenges

- Generic AAI-Portal
- Construction kit for new resource adaptors
- Less update issues for resource providers
- Filling gaps of AAI and resources
- Connecting VITELS to the AAI

# Implementation Status

- Architecture Draft 0.73
- Prototype Version 0.9.x
- 4 Resource Adaptors implemented
- 3 Resource Adaptors in preparation
- Open Source GNU/GPL
- Technical Documentation available
- VITELS AAI integration blocked
- Project URI: <http://aaitest1.unibe.ch>

# Outlook

- Project hand-over to SWITCH
- Move of project page to Sourceforge.net
- Improvement of code
- Integration of more resource adaptors
- Integration of more AAI adaptors
- Integration of community management features

# Live Demonstration
